I am a born again believer on a constant search for truth. I learn fast and new skills come easily to me. I thoroughly enjoy technology and most of my hobbies involve some sort of computer work.

I'm the type of guy who has a linux server on my refridgerator running an instance of Photoprism. As a gift I built a [living picture frame](#) from an old laptop screen, a Rasberry Pi, and my own Go app. I set up my own DNS server in my home to help moderate the content my family consumes. In short, web development technology is a passion of mine that has continued to excite me over the years.

I will be a valuable, hard working addition to any web development team with a wide range of complimentary skills. You can view my portfolio at nrjohnson.net.

Work History

Web Developer / Graphic Designer

GFA World (Gospel for Asia)

Jan 2022 - Present

I continue my role in Graphic Design. But after demonstrating skills in web development my role was split. My web work is primarily in front end, but I also work on the occasional back end job.

Graphic Designer

GFA World (Gospel for Asia)

Oct 2016 - Jan 2022

I create various publications that are used in print and web. These range from updates on basic pieces, like reply cards, to highly creative projects like magazines.
